

Gas Levels During Peak HP

WHAT DO THE COMBUSTION GASES MEAN HOW DO I USE THEM WITH A 5 GAS ANALYZER

GREEN is an desired range to be in

Yellow is a acceptable area to be in as long as other gases are not in the RED

Red is an area to use **EXTREME CAUTION** in

The bar chart above shows acceptable exhaust gas ranges during Peak HP for CO₂, CO, NOX, HC and O₂. These are general that would apply to most engines and base line readings
