

## WHAT DO THE COMBUSTION GASES MEAN HOW DO I USE THEM WITH A 5 GAS ANALYZER

**GREEN** is an desired range to be in

**Yellow** is a acceptable area to be in as long as other gases are not in the RED

**Red** is an area to use **EXTREME CAUTION** in

The bar chart above shows acceptable exhaust gas ranges during Peak Torque for CO2, CO, NOX, HC and O2. These are general that would apply to most engines and base line readings
